

Guesstimate

What you need:

group of players (4-6) sitting in a circle facing each other
deck of cards placed face down in a pile

Player #1 picks up one card and, without looking at it, holds it on his/her forehead so that everyone else can see it. Player #1 (with the card on his/her forehead) asks player #2 a question, such as, "Is it a ___?" Player #2 responds using the words "less than", "greater than", or "equal to". Player #1 has three guesses as to what the number on his/her forehead is.

If he/she is successful at guessing the number on his/her forehead in three questions, he/she may keep the card. If unsuccessful, the card is returned to the bottom of the pile.

Player # 2 then asks the next players about his/her card. Play continues for a set time. The player with the most cards at the end of the game is the winner.
